

The Post-graduate Program in Immunology, of the Institute of Biomedical Sciences, is pleased to invite all from our department to the seminar:

The pro-inflammatory effects of glucocorticoids in the brain and their implications in behavior

Carolina Munhoz

Carolina earned her BS in Pharmacy from UNESP (1999), and her PhD in Pharmacology from USP (2005). Part of her PhD was developed in Stanford University, and in Universidad Complutense de Madrid. She was a post-doctoral fellow at Stanford University (2006-2009). Currently, she is Assistant Professor at the Department of Pharmacology, USP, where she focuses in Neurosciences, Neuroendocrinology, Neuroinflammation, and Biochemical and Molecular Pharmacology
