

The Post-graduate Program in Immunology, of the Institute of Biomedical Sciences, is pleased to invite all from our department to the seminar:

The Good Side of Inflammasomes

Karina Bortoluci

BS in biological sciences (1995, Mackenzie), PhD (2003) and post-doc (2005) in Immunology from USP. Visiting researcher in Gulbenkian Institute (2004, Portugal), and Genentech (2016, USA). Head of the Dept. of Biological Sciences (2011 – 2013) and Coordinator of the Pro-Rectory of Post-Graduate Research (2017 - 2018, UNIFESP). Currently, she is associate professor of the Dept. of Biological Sciences and member of the Keystone Symposia Programming Consultants. Her research focuses on molecular pathways involved in inflammasome activation and the impact on infection control

Venue: Anfiteatro Ivan da Mota e Albuquerque (ROSA)
Edifício Biomédicas IV
Av. Prof. Lineu Prestes, 1730 -
Cidade Universitária.

Organizers:

Theresa Ramalho
Gustavo P. Amarante-Mendes
