

The Post-graduate Program in Immunology, of the Institute of Biomedical Sciences, is pleased to invite all from our department to the seminar:

Host and viral factors associated to neurologic and severe manifestations in arboviroses

Renato Santana

BS in Biological Sciences (UFMG, 1999), Ms in Biochemistry and Immunology (UFMG, 2002), PhD in Genetics (UFRJ, 2006), and postdoctorate in Microbiology and Immunology (UC San Francisco, USA). Currently, RS is associate professor in the Dept. of Genetics, Ecology and Evolution (UFMG), where his research focuses on molecular interactions between viral and cellular factors, genetic and epigenetic regulation and in the development of new antiviral molecules. He also develops projects in resistance to antiretrovirals (Ministry of Health), and has worldwide collaborations in viral infections.

Venue: Anfiteatro Ivan da Mota e Albuquerque (ROSA)
Edifício Biomédicas IV
Av. Prof. Lineu Prestes, 1730 -
Cidade Universitária.

Organizers:

Theresa Ramalho
Gustavo P. Amarante-Mendes

Informations:

Maria Eni do Sacramento Santos
3091-7277

October, 8th (Tuesday)
2pm
