

The Post-graduate Program in Immunology, of the Institute of Biomedical Sciences, is pleased to invite all from our department to the seminar:

# Identification of the Genetic Determinants of Hypertension using Forward Genetics in Mice

## José Eduardo Krieger

B.S. in Medicine from FMRP/USP (1984), PhD in Physiology from Medical College of Wisconsin (1988) supervised by Prof Allen Cowley. Post-doctoral fellow in Harvard (1989-1990) and Stanford University (1990-1992). He was Pro-Rector of Research at USP (2014 – 2018) and currently prof Krieger is member of the ABC and ACIESP. He is full professor at the Dept. of Cardiopneumology (FM/USP) and head of the Lab of Genetics and Molecular Cardiology (InCor/HCFMUSP) where his research focuses on the identification of molecular markers associated to the genesis of cardiovascular diseases and the development of new therapies for heart regeneration.

Venue: Anfiteatro Rosa  
Edifício Biomédicas IV  
Av. Prof. Lineu Prestes, 1730 - Cidade Universitária.
