

The Post-graduate Program in Immunology, of the Institute of Biomedical Sciences, is pleased to invite all from our department to the seminar:

The human thymus in the first years of life

Magda S. C. Sampaio

B.S. in medicine from UFPE (1973), PhD in pediatrics from USP (1978), and postdoc from World Health Organization in Switzerland (1983). In 1995 she was entitled full professor in the Dept. of Immunology, and she was director of ICB from 1997 until 2001. Currently she is full professor in the Dept. of Pediatrics (FMUSP) where she investigates primary immunodeficiencies autoimmunity, immunology of human milk, immune response of the youth and human thymus.
