

# MICROVASCULAR LEAKAGE IN INFECTION BY INTRACELLULAR PATHOGENS: DUAL ROLES OF IMMUNITY AND PROTEOLYTIC NETWORKS

## Júlio Scharfstein

BS and PhD in Biological Sciences from New York University under supervision of Prof. Victor Nussenzweig. Postdoc at Biotechnology Research Institute (CA). Currently, JS is full professor at Biophysics Institute of the Federal University of Rio de Janeiro, where his research the functional interrelationships between the immune response and pro-inflammatory proteolytic cascades activated at the endothelial interface. Also, JS is a member of the Brazilian Academy of Sciences and the Committee of the National Council for Scientific and Technological Development.

**October 27th (Tuesday), 12pm**

Registration and access: <https://zoom.us/j/91883329676>

Simulcast: @ppgimunousp <https://www.facebook.com/ppgimunousp/>  
Organizers: Tábata T. França, Paula P. Freire, Letícia G. Pontes and Gustavo P. Amarante-Mendes
