

The ImmunoWebinars announces:

TARGETING NEURO-IMUNE INTERACTIONS TO CONTROL NEUROPATHIC PAIN

Thiago Mattar Cunha

BS and PhD in Biological Sciences from Ribeirão Preto Medical School - USP. PhD in immunology from Harvard Medical School. TMC is currently a professor at the Ribeirão Preto Medical School - USP, where his research aims to study the neurobiology of inflammatory pain and the molecular mechanisms involved in the effects of analgesics. Also, TMC is editor of some international journals such as the Journal of Brain Research, Frontiers in Pharmacology, and Inflammation Research.

November 17th (Tuesday), 12pm
