

## IMMUNE CNS SURVEILLANCE: HOW OLD IS ALL THIS NEW

**March 9th (Tuesday), 12pm**

BS in Biology at the Tel Aviv University, Ph.D. in Neuroimmunology at the Weizmann Institute of Science. Currently, JK is a full professor of Neurology at Neuroscience and Neurosurgery, Washington University in St. Louis, United States. Dr. Jonathan Kipnis's research group focuses on the complex interactions between the immune system and the central nervous system. The goal is to elucidate the cellular and molecular mechanisms underlying these interactions in neurodegenerative, neurodevelopmental, and mental disorders as well as in physiology (including healthy aging).
