PLANNED ACTIVITIES

METHANE

MATERIAL AND METHODS

METHANOTROPHS BACTERIAS ENRICHMENT

Enrichment with methane for 40 days
10 to 70% CH₄: air atmosphere

Seven bacteria consortia

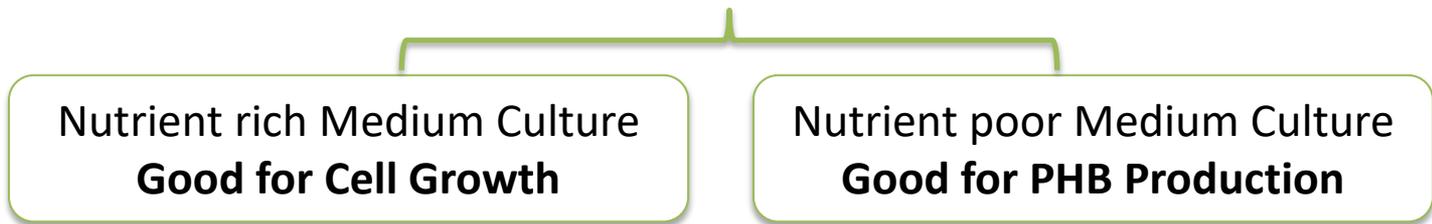

MATERIAL AND METHODS

PHB Production Experiments with CH₄

Large scale experiments with consortia
Different methane to air concentrations

Two different approaches:

PHB production evaluation:

Lipophilic dyes Nile Red

NEXT STEPS

- PHB Production Experiments with Isolated Bacteria
- Characterization of PHB
- Determination of Conversion Rates
- Comparison Between Isolated Bacteria and Consortia
