GESTÃO AMBIENTAL

II National Workshop on UI GreenMetric for Universities in Brazil

São Paulo, Brazil 7th-8th June 2018

BACKGROUND

Currently, issues related to sustainable development have been widely discussed. The term refers to the aim of meeting the current society needs without damaging the wellbeing of future generations and ecosystems resilience. Thus, higher education institutions have as their fundamental role to encourage the whole community to acquire, maintain and promote sustainable efforts in their routine. Also, it is expected that universities hold as reference of good practices for promoting sustainable development as a living laboratory for the cities.

The UI GreenMetric World University Ranking is an initiative of the University of Indonesia, with the aim of enabling an online survey of the current conditions and policies related to the sustainability of universities around the world. The results are collected through numerical data from universities, which are analyzed to arrive at a score that reflects the sustainable efforts being carried out by the institution. This initiative allows the comparison of universities around the world, as well as incentives to improve the efforts toward sustainability.

In 2017, 619 universities from 75 countries participated in the *UI GreenMetric World University*, with 64 universities in Latin America and 17 Brazilian universities.

In August 2017 it was hold the *Brazilian National Technical Workshop of UI GreenMetric* to encourage greater participation of Latin American universities in the UI GreenMetric. Several institutions participated in this meeting, showing great potential as a forum for exchange experiences and collective learning.

There is no doubt about the importance of creating a University Network with actions and interest in the theme of Sustainability at Universities, in the Brazilian and Latin American context. Thus this year, continuing the dialogues already started last year, the meeting aims to structure the network of institutions working on the theme, as well as presenting advances in research, teaching and extension related to the promotion of Sustainability at Universities.

Therefore, the event “*II National Workshop on UI GreenMetric for Universities in Brazil - 2018*”, having the background of strengthening this network, will also enable universities to show their initiatives, highlighting their experiences, results and difficulties with efforts to address the issue of sustainability inside their campuses.

The *II National Workshop on UI GreenMetric for Universities in Brazil – 2018* will be hold on June 7 and 8, with the first day reserved for the network structuring workshop to invitations addressed for interested universities. On the second day, the seminar will be open to all public interested in these themes, as a forum for presenting cases, difficulties and challenges in the direction of achieving more sustainable campuses.

PROGRAM

Below is a draft version of the *II National Workshop on UI GreenMetric for Universities in Brazil* program.

AIMS

The aims of the “*II National Workshop on UI GreenMetric for Universities in Brazil*” are as follow:

- i. To form strategic networks in Brazil and in Latin America, that will enable working together in *UI GreenMetric World University Rankings* network;
- ii. To encourage universities to collaborate and learn from each other in dealing with sustainability issues;
- iii. To provide an opportunity to display and present their works and to share the best practices in creating a sustainable condition in universities.

PROFILE OF PARTICIPANTS

The participants of the event will be the universities representatives that have interest to form strategic networks in Brazil and in Latin America, and also professionals, researchers and students that want to share their experiences, results and difficulties and learn more about the efforts that universities are focusing on achieving their goals.

STRUCTURE OF THE EVENT

The “*II National Workshop on UI GreenMetric for Universities in Brazil*” will be organized as follow:

Day 1 - Network Workshop (for invited Universities representatives)

Day 2 - Seminar (open for all participants)

STRAND 1: Poster Sessions

Participating universities and organizations will be able to put up posters describing their works and projects and share important information. The posters session will be the axis of the workshop and will allow exchange of knowledge and experiences among the participants.

STRAND 2: Presentations

A set of presentations, divided into 3 main sessions will be organized, as following:

Session 1: UI GreenMetric World University Rankings: Trends and Challenges

Session 2: to be defined

Session 3: to be defined
